

## Working Group Topics

### Session I | Integrated Approach | time available: 30 minutes

#### Session-Mentor: Bernd-Ulrich Netz

**1) Natura 2000-management-plans – (other) examples** (2x Kristijan Čivić (I.A), Frank Neumann (I.F))

- Are there (other) best-practice-examples for Natura 2000-Management-Plans? (Which?)
- Have they proved themselves effective during implementation?
- Is there a gap between objectives and reality? Are there examples where those gaps were closed?

**2) The imbalance of sediment budgets in estuaries** (1x, Bernd-Ulrich Netz (I.B))

- Examples: How do the member states deal with the imbalance of the sediment budgets in estuaries?
- How is the environmental impact assessment run, for the imbalance as well as for the ways to solve the problem?
- Is the environmental impact assessment part of the management plan?

**3) Dealing with natural dynamics** (2x, Dr. Kirsten Wolfstein (I.C), Dr. David Parker (I.G))

- How can the management of Natura 2000 sites (better) deal with natural dynamics (e.g. the effects of climate change or succession)?

**4) Key success factors for implementing management plans** (2x, Prof. Patrick Meire (I.E), Prof. Mike Elliott (I.D))

- What examples are there for successful integration of various uses and Natura 2000-goals?
- What are the key factors for successful integration of uses and Natura 2000?
